NO. 717 and 721 FLEXIBLE GUARDRAIL DELINEATORS

Big, Bright and Economical

AKT model 717 and 721 each have 8 square inches of reflectivity providing excellent delineation. The shape of both units allows each to fit comfortably within the channel of the guardrail protecting it from accidental damage and vandalism. Installation is quick and easy using either existing bolts (717) or cement (721). Both units are available in either Amber or Silver reflective sheeting applies to one side or both sides.

FEATURES

- Good visibility under all weather conditions
- Smooth, high-gloss surface sheds dirt, dust and water for long-lived reflectivity.
- Reflective sheeting surface will not separate from mounting bracket due to weather or temperature and adheres so tenaciously it is virtually vandal proof.
- Rugged Polycarbonate bracket has slotted base (717) which fits under the collar of existing guardrail bolt or semisolid base (721) which glues into guardrail.
- Will not be damaged by ice or snow thrown up by snow plows.

Model 721
(Glue on)

Model 717
(Bolt on)

SPECIFICATIONS

Effective Reflex Area –

Approximately 8 square inches
